

FOUNDING 10 PROPOSAL — STAGE 1

AIM Financial × DigitalGate

Digital Business Infrastructure &
Growth Platform

PREPARED FOR

Nathan Gumbleton

AIM Financial

PREPARED BY

Ben Roe

Founder & Platform Architect · DigitalGate

EXECUTIVE SUMMARY

A connected digital foundation for AIM Financial and Hi-Vis Finance

DigitalGate will establish the technology and digital growth platform supporting both AIM Financial and Hi-Vis Finance — not as a simple website quotation, but as connected business infrastructure.

AIM Financial is the established business Nathan intends to retain. Hi-Vis Finance is being developed as a distinct digital business asset, with the option to grow and later separate or sell it.

The goal is to avoid fragmented tools and instead create one coherent system spanning website, CRM, leads, automation, AI, analytics, SEO and business data.

Website

CRM

Leads

Automation

AI

Analytics

SEO

Business data

One platform. Two brands. One connected digital ecosystem.

What Stage 1 delivers

- DigitalGate Platform implementation
- AIM Financial website
- Hi-Vis Finance website
- CRM foundation & initial migration
- Lead capture, automation & analytics
- SEO & AI / Business Brain foundations
- Architecture for later Hi-Vis separation

What Stage 1 deliberately excludes

- Managed IT & cybersecurity (Stage 2)
- Substantial bespoke third-party integrations until assessed and approved
- Third-party licence fees unless explicitly stated
- Paid advertising spend

Stage 2 Managed IT & Cybersecurity will be separately scoped later. No Stage 2 pricing is included here.

THE OPPORTUNITY

From fragmented tools to connected infrastructure

Today's stack works — but it doesn't compound. DigitalGate replaces that fragmentation with a single operating layer behind both brands.

CURRENT
AIM Financial

- Wix website
- Lend CRM
- Separate Meta activity
- Limited analytics
- No established SEO programme
- Various external integrations
- Systems operating independently

PROPOSED
DigitalGate Platform

- AIM Financial website
- Hi-Vis Finance website
- CRM & lead capture
- Automation
- AI / Business Brain
- Analytics & SEO foundation
- Reporting & connected workflows

CONNECTED MODEL

AIM Financial
Established brand

DigitalGate
Shared operating layer

Hi-Vis Finance
Separable digital asset

AIM FINANCIAL

Modernising the established business

AIM Financial receives a native DigitalGate-powered digital foundation — modern presence, shared customer context and clearer operating rhythm.

Presence & capture

- New native DigitalGate-powered website
- Forms and lead capture
- Analytics instrumentation
- SEO foundations

CRM & operations

- CRM foundation and pipelines
- Lead and opportunity management
- Core workflows & reporting
- User access for up to five users initially

Intelligence

- Automation for agreed core workflows
- AI / Business Brain foundation
- Connected business data

Migration

- DigitalGate organisation and platform setup
- Structured migration from existing systems where appropriate
- Initial CRM migration within reasonable agreed scope

Outcome: AIM Financial runs on clearer digital infrastructure — without losing the business Nathan intends to retain.

HI-VIS FINANCE

Building a digital business asset from day one

Hi-Vis Finance is approached differently. It should be built as a distinct business asset — not simply as a second website.

Distinct from day one

- Independent brand presence
- Dedicated website
- Separate lead attribution
- Separate analytics
- Separate CRM structure where appropriate
- Dedicated workflows and reporting
- Clean data separation

Future transferability

- Ability to later operate independently
- Brand, website, CRM data, analytics and workflows structured for separation
- Ability to move to a separate DigitalGate subscription if sold

If Hi-Vis Finance is sold and separated from AIM, the acquiring party would require its own DigitalGate platform subscription.

STRUCTURE

Nathan / AIM Group

AIM Financial

Hi-Vis Finance

DigitalGate Platform

Later: Hi-Vis can detach cleanly — brand, data, workflows and subscription path prepared for transfer.

DIGITALGATE PLATFORM

The operating layer behind both brands

AIM and Hi-Vis will not just have websites sitting separately from the business systems. Website, CRM, automation and business data should work together.

Shared substrate

Identity, customers, context, permissions, events, intelligence, automation and reporting attach to one platform — so adding capability extends the system instead of creating another island.

Brand-aware structure

AIM and Hi-Vis keep distinct brand presence and attribution while sharing the DigitalGate operating layer during the initial engagement.

DigitalGate retains ownership of the platform, underlying technology, reusable modules and general IP. AIM retains ownership of its business data, content and client information.

IMPLEMENTATION SCOPE

What Stage 1 includes

01 · DISCOVERY & ARCHITECTURE

Clarify the target state

- Workshop with Nathan and Jessica
- Map existing workflows
- Review Lend usage
- Map lead sources
- Review current integrations
- Define target state

02 · AIM FINANCIAL WEBSITE

Modernise the established brand

- Design & build
- Content migration where appropriate
- Lead capture
- Analytics & SEO foundations
- DigitalGate integration

03 · HI-VIS FINANCE WEBSITE

Build the separable asset

- Design & build
- Lead capture
- Analytics & SEO foundations
- Platform integration
- Structure for future separation

04 · PLATFORM CONFIGURATION

Stand up the operating layer

- Organisation setup, users & permissions
- CRM, pipelines & forms
- Workflows & dashboards
- Business Brain foundation

05 · INITIAL CRM MIGRATION

Move agreed data carefully

- Assess current Lend data
- Map fields
- Import agreed data
- Configure core CRM structure
- Validate migration

06 · INITIAL AUTOMATION

Make enquiry flow work

- Lead capture
- Notifications
- Task creation
- Enquiry acknowledgement
- Agreed core workflow automation

INTEGRATIONS

Integration discovery & advanced development

DigitalGate will assess what should remain, integrate, be replaced, be migrated or be improved. Substantial bespoke third-party work is not automatically included.

Known external services in scope for assessment

Illion

BankStatements

Equifax

VedaCheck

Lender integrations

Verimoto

Olasio Vehicle Inspection

ABN Lookup

Meta

Adobe

Included

- Integration assessment during discovery
- Lend integration requirements assessed during discovery
- Clear recommendation on remain / integrate / replace / migrate / improve

Not automatically included

- Custom API development
- Vendor certification
- Third-party licensing or commercial agreements
- Substantial bespoke development

Integration assessment is included. Substantial bespoke integration development is separately scoped where required.

Existing integrations such as Illion, BankStatements, Equifax, VedaCheck, lender integrations, Verimoto, Olasio and other third-party services are subject to technical and commercial assessment. Any significant bespoke integration work discovered will be separately scoped and approved before development.

IMPLEMENTATION ROADMAP

How Stage 1 progresses

A practical sequence from discovery to launch — paced by discovery findings and agreed priorities.

PHASE 1**Discovery & Architecture****PHASE 2****Platform Foundation****PHASE 3****Website Design & Build****PHASE 4****CRM Configuration & Migration****PHASE 5****Automation & Analytics****PHASE 6****Testing, Launch & Optimisation****Working method**

Discovery shapes architecture. Platform foundation comes before content polish. Migration and automation follow a validated CRM structure. Launch is deliberate — then we optimise against real usage.

FOUNDING 10 PARTNERSHIP

AIM Financial Founding 10 benefits

Founding 10 is limited access — not discounted access dressed up as a sale. It is early partnership with direct founder involvement.

Commercial & access

- Preferential platform pricing
- Heavily reduced implementation investment
- Priority onboarding
- Early access to new DigitalGate functionality
- Founding 10 recognition

Influence & evolution

- Direct founder involvement
- Ability to help influence useful platform features
- Priority consideration for platform improvements that can benefit other DigitalGate customers
- Ongoing platform evolution

General platform improvements may become part of the DigitalGate product roadmap.

AIM-exclusive bespoke functionality may be separately scoped.

INVESTMENT

Clear commercial terms for Stage 1

FOUNDING 10 IMPLEMENTATION INVESTMENT**\$9,950** ex GST

One-time Stage 1 implementation for AIM Financial, Hi-Vis Finance and DigitalGate platform foundation.

DIGITALGATE PLATFORM**\$997** ex GST / month

Ongoing platform access for the agreed AIM group structure, including AIM Financial and Hi-Vis Finance during the initial engagement.

First-year investment · 12-month initial term $\$9,950 + (\$997 \times 12)$ **\$21,914** ex GST**Implementation includes**

- AIM Financial website
- Hi-Vis Finance website
- DigitalGate platform setup
- Discovery
- CRM configuration
- Agreed initial migration
- Core automation
- Analytics
- SEO foundations
- AI / Business Brain foundation
- Hi-Vis sale-ready architecture

Initial CRM migration is included within reasonable agreed scope. Significant bespoke integration work is not automatically included.

STAGE 2

Managed IT & Cybersecurity

Once Stage 1 is underway, DigitalGate will separately assess and propose managed IT and cybersecurity for AIM Financial.

Microsoft estate

- Microsoft 365
- Business Premium
- Microsoft administration

Security controls

- Intune
- MFA
- Conditional Access
- Endpoint management
- Cybersecurity

Operations

- Backups
- Email security
- Device management
- Helpdesk
- Onboarding / offboarding
- Monitoring and patching

Stage 2 will be separately scoped and approved.

No Stage 2 pricing is included in this proposal.

COMMERCIAL TERMS / SCOPE

Boundaries that keep the engagement clean

Commercial

- All pricing stated ex GST
- 12-month initial platform term
- Payment terms to be confirmed on acceptance (DigitalGate commercial standards)
- Implementation commences following acceptance and initial payment

Scope

- Scope subject to reasonable discovery findings
- Significant third-party integration development excluded unless specifically approved
- Third-party licence fees excluded unless explicitly stated
- Paid advertising spend excluded
- Ongoing high-volume SEO/content campaigns excluded unless separately contracted
- Managed IT is excluded from Stage 1

Intellectual property & data

- DigitalGate owns underlying platform IP, reusable modules and general platform technology
- AIM owns its business data, content and client information
- Hi-Vis Finance brand, website, CRM data, analytics, workflows and digital assets structured for later separation or transfer
- If Hi-Vis is sold and separated, the acquiring party requires its own DigitalGate platform subscription

Confidentiality

- This proposal is confidential to AIM Financial and DigitalGate
- Both parties will treat commercial and operational information with appropriate care

NEXT STEPS

How we begin

- 1 Accept the Stage 1 proposal
- 2 Confirm Founding 10 terms
- 3 Complete onboarding
- 4 Schedule Nathan + Jessica discovery session
- 5 Begin DigitalGate platform and website implementation
